

*This set up includes External Valves which are an optional item

Size Coupling is securely fastened to both filter pump hose and external valve

Remember to insert baskets from other end inside the water to keep lids from closing. The baskets can be softened in hot water for a better fit

Remember to have wingnut clamp at the base of the hose over the o-ring location

For a snug fit o-ring placement is crucial and should not be crooked but in its groove in the hose

Remember to soak wingnut clamps in warm water to soften before attaching to filter pump hose do not force onto external valve stem

Please DO NOT overtighten clamps or strip the threads. Plumbing tape can be easily used to reinforce connections

Wingnut clamp should be securely fastened near the threads of the filter pump hose. Heater connector should be securely fastened to the metal ports of the heater
